LOVELL HOMES

Sustainability Project

4GS

Why is sustainability important to us?

We are the future and want to educate others to make better choices to protect the environment.
-Jessica

We don't want to run out of resources.
-David

We want to protect the Earth.
-Kylah

We want to make smart choices of the things we buy and use to reduce waste.
-Harry

We want to keep animals and our homes safe.
-Siena

Idea 1:

We want to be able to grow our own fruit and vegetables to eat at breaktimes and use in our lunches. This will help to reduce deliveries into school.

To do this we could have our own farming area by the field that could include an area to plant vegetables as well as a greenhouse. We could have a farming club to ensure it is used effectively.

Idea 2:

We want to create less waste.

To do this we could create class compost bins to be used to throw fruit and vegetable peels. We could then use bigger compost bins to collect the class waste to create compost to use with our plants. We could also have water tanks to help collect rainwater to use to water our plants.

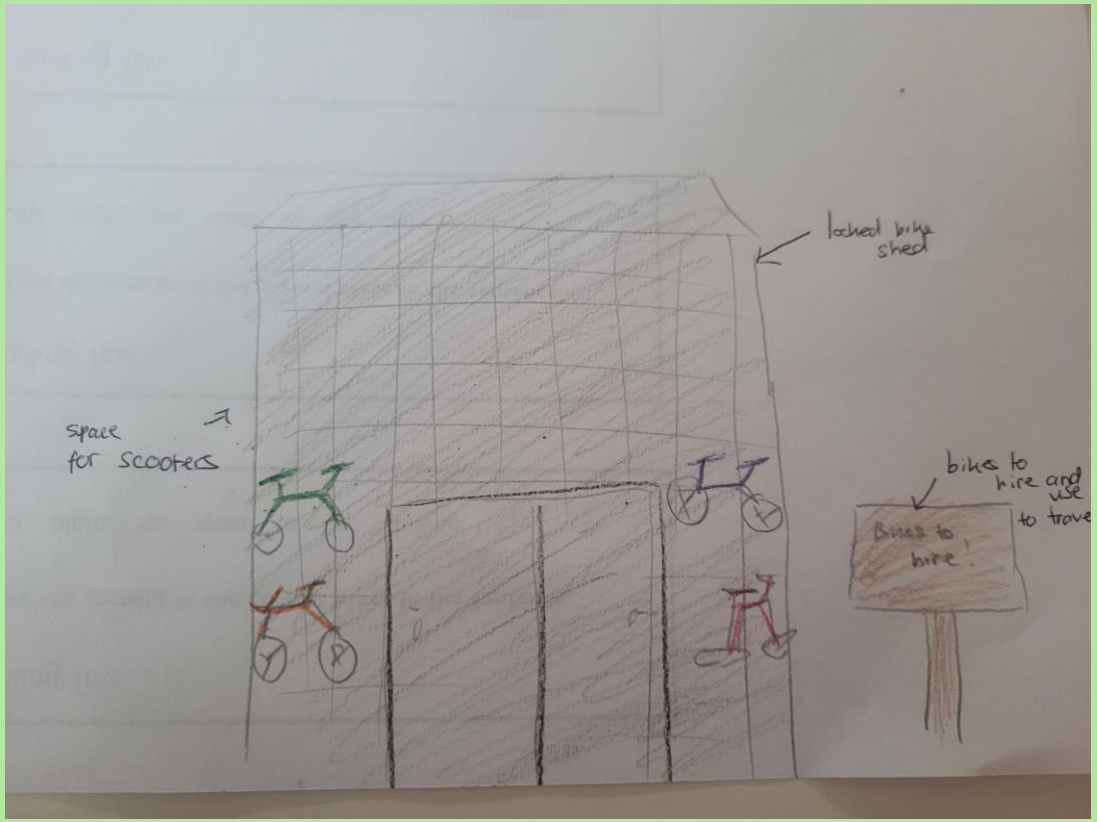

Idea 3:

We want to help recycle and reduce waste.

We love to read but books are expensive to buy and once we've read a book it can sometimes go to waste. We could build a book swap area full of children books so that at home time with our parents we can bring in an old book and swap it for a new one to read.

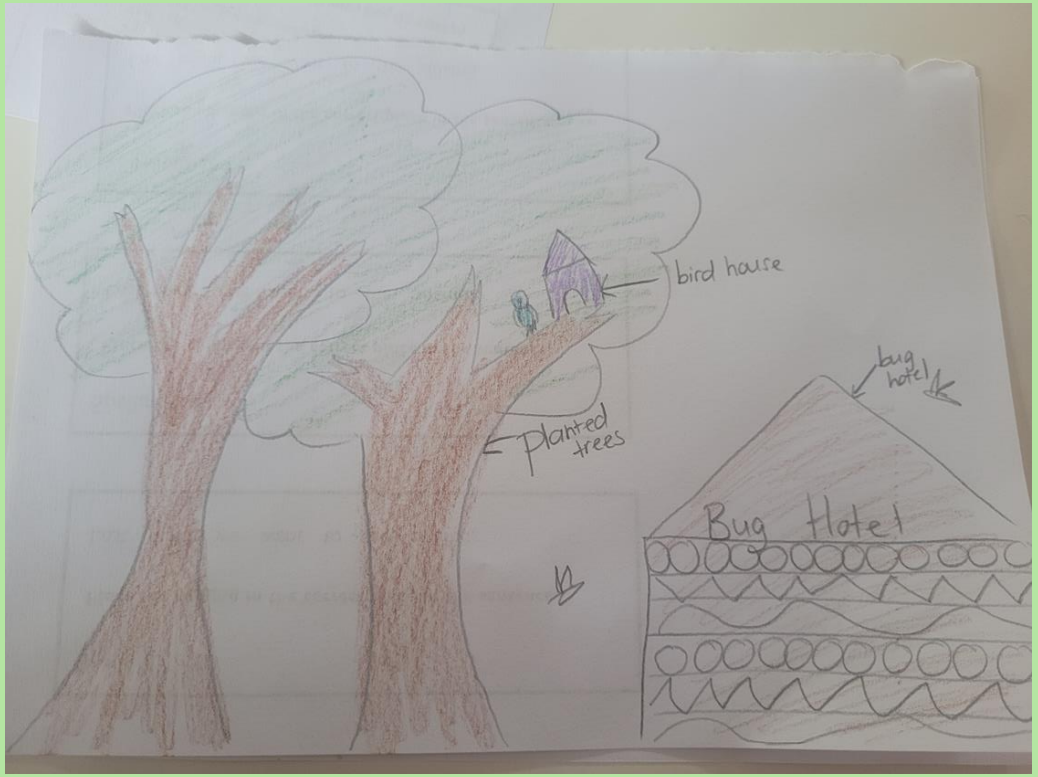

Idea 4:

We want to reduce pollution.

To do this we could build a locked bike and scooter shelter to encourage walking, biking and scooting to school instead of driving. It would mean bikes/ scooters could be kept safe at school during the school day. In the future, it would be also helpful to have bikes or scooters that we could hire and use. People could even donate their old bikes to use.

Idea 5:

We want to help the environment and save animal habitats.

To do this we could have a tree planting area. As a school we can sometimes use a lot of paper. We would like to ensure we stop all the trees from being cut down. This area could also include a bug hotel and bird houses to enable habitats to be created for wildlife.

LOVELL HOMES

We hope you like our ideas.
